

# NEW RECORDS OF HAPLOPHYLLUM JUSS. (RUTACEAE) FROM IRAN

M. R. Joharchi & M. Assadi

Joharchi, M. R. & Assadi, M. 2007 12 31: New records of *Haplophyllum* Juss. (*Rutaceae*) from Iran. -*Iran. J. Bot.* 13 (2): 99-103. Tehran.

*Haplophyllum* Juss. has 30 species in Iran of which 14 taxa are endemic to Iran. The genus has been revised for the *Rutaceae* Flora of Iran. In this paper *H. erythraeum*, *H. ptilostylum* and *H. tenue* are reported for the first time from Iran.

Keywords. *Haplophyllum*, New records, Iran.

گزارش‌های جدید از جنس هاپلوفیلوم (تیره سداب) از ایران

محمد رضا جوهرچی و دکتر مصطفی اسدی

جنس هاپلوفیلوم در ایران دارای ۳۰ گونه است که ۱۴ گونه آن انحصاری ایران هستند. فلور ایران برای تیره *Rutaceae* تدوین یافته و در این مقاله گونه‌های *H. erythraeum* و *H. ptilostylum* و *H. tenue* برای اولین بار از ایران گزارش می‌شوند.

## Introduction

*Haplophyllum* Juss. is the largest genus of *Rutaceae* in Iran. It has 30 species in Iran that 14 taxa are endemic to Iran. Most species of the genus *Haplophyllum* in Iran are Irano-Turanian elements. During the studies on the genus *Haplophyllum* in Iran for the Flora of Iran project (in Persian) we found three new species records from Iran.

***Haplophyllum erythraeum* Boiss.,** Diagn. 2, 1: 114 (1853).

*Haplophyllum erythraeum* is reported for the first time from Northeast of Iran (Khorasan provinces). It is distributed in Afghanistan and Pakistan (Map 1).

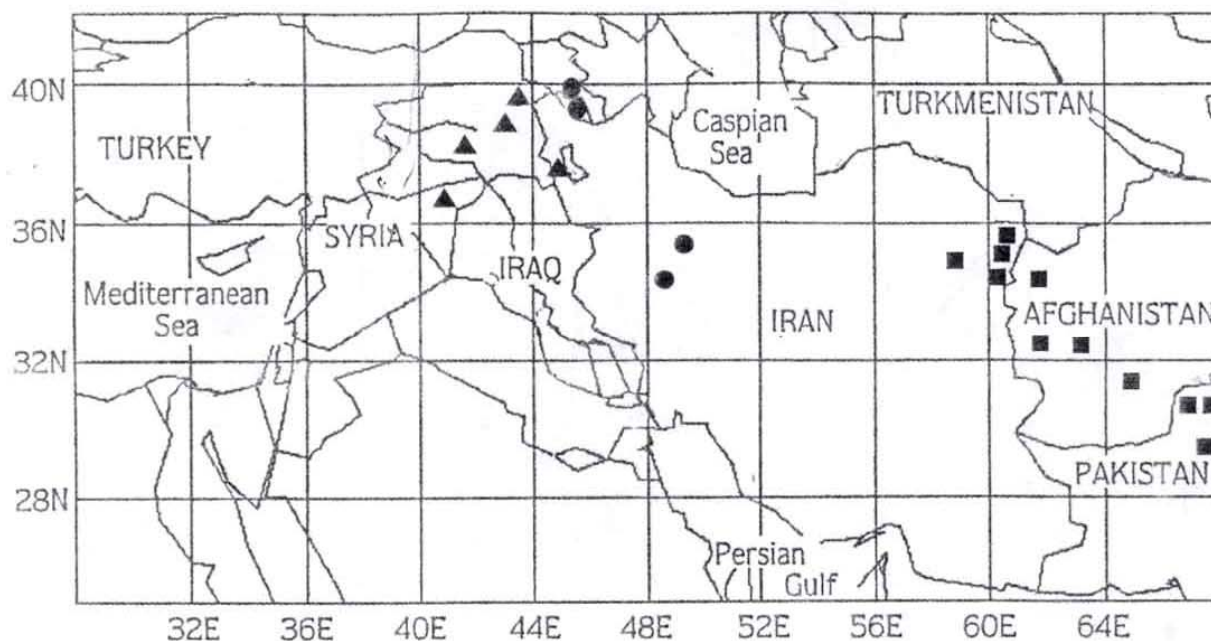

*Specimens seen.* Khorasan: Taybad towards Dogharoom, 800 m Mozaffarian 67588 (TARI); Khaf, Salami dam, 1450m, Joharchi & Zangooe 17154 (FUMH); Torbat Heydariyeh towards Khaf, km 10, 1350 m, Joharchi & Zangooe 19969 (FUMH); Torbat Jam, Cheshmeh Gol rangeland, Gourband Station, Moussavi & Paryab 8185; Torbat Jam towards Shahrno Bakharz km 10, 1070 m, Assadi & Amirabadi 9300.

***Haplophyllum ptilostylum* Spach,** Ann. Sc. Nat. Bot. 3.11: 181 (1849).

*Haplophyllum ptilostylum* is reported for the first time from Northwest of Iran (Azerbaijan Gharbi province). It is distributed in Northeast of Syria, Southeast and East of Turkey (Map 1).

Type specimen in Flora Orientalis (Boissier 1867) on the base of Aucher Eloy collection (Auch. 3312) has been reported from South of Iran, but Townsend (1986) believed that this locality certainly is not correct. We think that the latter idea is correct because any herbarium specimen has not been seen up to now in South Iran.

*Specimens seen.* Azerbaijan Gharbi: Khoy, Gharatappah, 1600m, Mozaffarian 72800 (TARI); North of Uromiyeh, Kahriz station, 1330 m, Alizadeh & Ghasempour 1568; also, Saatlou station 1320 m, Heydari, Larti & Kazempour 3298.

Map. 1: Distribution map of *Haplophyllum erythraeum* (■), *H. ptilostylum* (▲), *H. tenue* (●).

**Haplophyllum tenue** Boiss., Fl. Or. 1: 932 (1867).

*Haplophyllum tenue* is reported for the first time from West of Iran (Hamadan province). It is distributed in Armenia and Nakhichevan (Map 1).

*Specimens seen.* Hamadan: Malayer road from Siah Kamar towards Kardkhord, Gheshlagh-e Abhendou, 1900 m, Mozaffarian 64649 (TARI); Hamadan to Saveh, 5 km from Tajarak towards Noubaran, Dokhan pass, 1600-1900 m, Mozaffarian 65026 (TARI).
