Abstract

In this talk we intend to determine the structure of the n -dimensional Hawaiian group of the m -dimensional Hawaiian earring space, where $m, n \geq 1$. Also, we show that similar to homotopy functors, Hawaiian group functors preserve product, and for $n \geq 2$, Hawaiian groups are abelian.

Mathematics Subject Classification: Primary 55Q05, Secondary 55Q20, 54F15.

Keywords: Hawaiian group, Hawaiian earring, weak join.
